Specs of Liquid Filtration Pleated Filter Cartridge Machines

Pleated filter cartridge machine/production line is specially for making liquid filtration pleated filter cartridges. Auto filter cartridge, water or drinking fountain filter cartridge, PP pleated filter cartridge and other kinds of pleated filter cartridges are available, normal PP pleated filter cartridge and big and fat pleated filter cartridge are available.

1. Main Parts

A. Pleated cartridge ends welder	B. Pleated cartridge length connector
C. Pleated cartridge double ends cutting part	D. Pleated cartridge middle seam welder

2. The Applicable Scope

Pleated filter cartridge machine/production line is specially for making liquid filtration pleated filter cartridges. Auto filter cartridge, water or drinking fountain filter cartridge, PP pleated filter cartridge and other kinds of pleated filter cartridges are available, normal PP pleated filter cartridge and big and fat pleated filter cartridge are available.

3. Specs Of Liquid Filtration Pleated Filter Cartridge Machines

A. Pleated cartridge ends welder	Frame: Folded plate welding and standard bolt connecting structure Heating Mould: Brass H62, good thermal conductivity, temperature range: 0 ~ 399 degree C Control Mode: PLC, Pneumatic way Power: 380V 1.5 KW Working air pressure: 0.6MPa Weight: 550kg Size: L1350xW755mmxH1900mm
B. Pleated cartridge length connector	Frame: Folded plate welding and standard bolt connecting structure Heating Mould: Brass H62, good thermal conductivity, temperature range: 0 ~ 399 degree C Control Mode: PLC, Pneumatic way Power: 380V 1.5 KW Working air pressure: 0.6MPa Weight: 550kg Size: L1350xW755mmxH1900mm
C. Pleated cartridge double ends cutting part	Frame: Folded plate welding and standard bolt connecting structure Rotating cutting knife Power: 380V 50Hz Size/Weight: according to pleated cartridge length range
D. Pleated cartridge middle seam welder	To weld the seam or joint in the middle of filter cartridge

4. Features of Liquid Filtration Pleated Filter Cartridge Machines

A. Pleated cartridge ends welder:	Welding temperature, welding time, welding depth is controlled automatically. Special for welding covers/ends of pleated filter cartridges. Good and stable sealing ability and fastness Controlled automatically Easy operation
B. Pleated cartridge length connector	Ensure that the filter cartridge is straight. Controlled automatically. Easy operation For standard model, after connecting, the length can be up to 70inch. Other length can be custom made.
C. Pleated cartridge double ends cutting part	Cutting both ends of filter cartridge automatically. Ensure that the cutting ends are flat and smooth. Improve production capacity.
D. Pleated cartridge middle seam welder	High quality welding seam. Easy operation.
